at the ED doors**

**Why should  
trauma education?**

**TCAR**  
EDUCATION PROGRAMS

**The trauma nursing course  
that starts . . .**

**Where the other courses end**

## **Target Audience**

This course is designed to give pediatric nurses who work in acute care, critical care, and perioperative areas the foundational, evidence-based information and critical thinking skills necessary to care for the hospitalized injured child. PCAR covers a wide range of pathophysiologic and nursing concepts and is designed to be a broad, core-level program, rather than an advanced or specialty-specific course. PCAR is the peds-specific version of the adult-focused TCAR course. Core concepts presented in both programs are similar.

## **Course Content**

**Part 1** is an introduction to basic topics relevant to the nursing care of the hospitalized pediatric trauma patient:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

**Part 2** employs an interactive case-based learning approach. Participants follow an injured child from hospital admission to discharge. Each module is designed to introduce specific trauma care concepts including pathophysiology, assessment modalities, and complications. Surgical, medical, and nursing management options and outcome criteria are presented while discussing children with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Craniocerebral trauma
- Spine & spinal cord trauma

# **Pediatric Care After Resuscitation**

**A 2-Day Trauma  
Fundamentals Course**

**Monday & Tuesday**

**May 9 & 10, 2016**

**8:00 am - 4:30 pm**
